			On May 19, 2015, Marion County voters approved the creation of the						
			Marion County Extension and 4-H Service District. The service						
			district's governing body and its budget committee met on July 30,						
			2015. At this meeting, the service district approved the language						
			included in the IGA presented to the BOC. On that same day and						
			during the service district's budget committee meeting, its budget						
			was approved, which supports expenses associated with this IGA.						
			The total amount of the IGA for FY15-16 is \$1,398,341. For the						
			remaining years, the annual amount will be based on the amount						
			approved within the annual budget for the Marion County Extension

			Contract for the hauling and recycling of electronic waste collected at SKRTS and North Marion. This contract is retroactive back to July 1, 2017. Public Works has been contracting with Garten Services since 2008 under the State of Oregon's QRF program. It came to our attention that the services provided by Garten Services in this contract may not actually meet the specific requirements spelled out under the QRF program and that we may have flexibility in selecting another contractor. Once we were informed that Garten Services was still a QRF provider for these services, we sent them a contract. However they needed to have the State review the terms of our contract again to be sure that its in compliance with the QRF rules. In all this process took much longer than anticipated, in part because of staff turnover at the State and because our own internal interpretation required input from several people. This was a unique circumstance that we don't for sees happening again so we do not anticipate this delay in the contracting process in the future.

					Public Improvement Agreement with Bill Erickson Heavy Construction						
					Inc. to perform stormwater system improvements on Draper Street in East Salem. Draper Street Stormwater System is designed to						
					relieve the flooding at a portion of Draper Street that presently has						
					no outlet, causing severe flooding to the roadway. The project						
					involves the addition of two new inlets and a junction manhole						
					within the Draper Street cul-de-sac flooded area, plus installation of						
					530 ft of 6" C900 storm sewer to convey stormwater to another new						
					inlet adjacent to an existing stormwater trunkline. Amendment 1						
					adds bid items to pay for extra work required to field fit and modify a						
					manhole and to add inlet protection to minimize sediment transport. Additionally, changes requirement for Level 2 asphalt mix to Level 3						
					asphalt mix due to time constraints and unavailability of materials at
