

# **Auburn Road Transportation Enhancement Improvements**

## **Project Location**

Auburn Road from Lancaster Drive to Baldwin Ave

## **Project Purpose and Need**

- Auburn Road experiences a significant amount of bicycle and pedestrian traffic. Children going to and from school and an adjacent park must walk or bike on gravel and dirt shoulders.
- The proposed improvements would significantly reduce hazards to bicycles and pedestrians along the project and would provide them a link to side street sidewalks from Baldwin Ave. to Lancaster Blvd.

## **Proposed Construction Overview**

1. Construct sidewalks and bike lanes from Baldwin Ave to Brenner Street.
2. Replace deficient ADA ramps from the School, west to Lancaster Blvd.
3. Provide Street lighting on existing power poles.
4. Improve drainage to accommodate the additional roadway and sidewalk.

## **Cost Estimate**

- Estimated construction Cost is \$2.2M
- Funded through a federal transportation enhancement grant and local match designed to fund urban bike and pedestrian enhancements.

## **Key Milestones**

Project Design	2012-2013
Right of Way Acquisition	2013
Estimated Bid Let	Summer of 2013
Construction	Fall of 2013/Spring of 2014
