H1N1 Vaccine Now Available in Marion County Pharmacies

H1N1 vaccine is now available for anyone 6 months and older, including people over 65 and children six months through nine years who need a booster vaccine. Pharmacies throughout Marion County are currently dispensing H1N1 injectable vaccine to members of the general public age 15 years and older. A list of participating pharmacy locations is available on the Marion County Flu Website at <http://www.co.marion.or.us/HLT/>. Interested people may also call the Marion County Health Department at (503) 584-4870 for information.

People interested in receiving the H1N1 vaccine at a pharmacy should call ahead to get information on the cost, and the dates and hours pharmacists are administering the vaccine. Pharmacies are charging between \$15 – 20 to administer each vaccine, although they may be able to bill insurance plans. Oregon law permits people 15 years of age and older to be vaccinated by a pharmacist.

In addition to pharmacies, health care providers are still receiving the vaccine. People can call their doctor’s offices to find out if H1N1 vaccine is available there and what the administration cost may be.

Appointments are also available at the Marion County Health Department. There is no charge for receiving the H1N1 vaccine from the Health Department. People can schedule an appointment at the Health Department by calling (503) 584-4870.

While cases of H1N1 flu have dropped off over the past few weeks, there is a good possibility that additional waves of illness may occur over the next few months. Health officials continue to urge people to get vaccinated to reduce the chance of becoming sick later this winter. “We are encouraging everyone six months and older to get vaccinated against H1N1 flu,” says Marion County Health Officer Dr. Karen Landers. "The best way to protect yourself and others from the H1N1 flu is to get the vaccine."
