

Traffic Control FAQs

What is Traffic Control?

Traffic control is the supervision and manipulation of the movement of people and vehicles to ensure efficiency and safety.

How do I know what I need to setup for my Work Zone?

If a Traffic Control Plan (TCP) is not included in your permit, you can follow either the most recent:

[Oregon Temporary Traffic Control Handbook](#)

Or the most recent:

[Manual on Uniform Traffic Control Devices](#)

How do I pick the right flagging company?

Do your research. Confirm the company you are using has a valid and current Oregon CCB

License and their flaggers have current certification recognized by the State of Oregon

Why do I need Traffic Control?

Traffic Control is required to keep you, your contractor, and the traveling public safe. If done correctly, it provides a safe avenue for vehicles, pedestrians, and bicycles to travel through or around your work zone, eliminating confusion as well as potential hazards that may arise due to work being conducted in the right-of-way.
