

ELEVATION / FLOODPROOFING CERTIFICATION

90 90-1

INSTRUCTIONS: As a condition of approval for a Flood Plain Development Permit a certification of structure elevation or floodproofing may be required (Section 178.060 of the Marion County Zoning Ordinance). Section 1 of this form is for the purpose of certifying that a structure has been constructed so that the lowest floor is at an elevation of one (1) or more feet above the 100 year flood level. The certification must be completed by a registered land surveyor or civil engineer.

Section 2 is used to certify that a structure has been adequately floodproofed. It must be completed by a registered civil/structural engineer.

Please complete the applicable section and certification and return the completed form to the County Planning Department at 220 High Street NE, Salem, Oregon.

SECTION 1

I certify that the ~~structure~~ ^{ground} located at (address) 17515 South Abrya Road is ~~constructed so that the lowest floor~~ ^{situated at the home site or adjacent} ~~to it~~ ^{is} at an elevation of 396.4 feet NGVD (mean sea level), on July 29, 1988.

SECTION 2

I certify that the structure located at (address) _____, together with the proposed utility and sanitary facilities, are designed so that the structure will be watertight to an elevation of _____ feet NGVD (mean sea level), with walls substantially impermeable to the passage of water and structural components having the compatibility of resisting hydrostatic and hydrodynamic loads and effects of bouyancy.

My certification is conditional upon the actual construction of the building in strict accordance with the plans presented to me.

In the event of flooding, will this degree of floodproofing be achieved with human intervention? _____ (see Note)

Will the structure be occupied as a residence? _____

NOTE: Floodproofed with human intervention means that water will enter the structure when floods up to the base flood level occur, unless measures are taken prior to the flood to prevent entry of water (e.g., bolting metal shields over doors and windows).
