Description of Services or Grant Award

Marion County's primary data center in Public Works Building 1 lacks redundant power and cooling, creating significant risks for mission-critical operations. This project will relocate the County's core IT infrastructure to the State of Oregon's Tier 3 data center, which provides fully redundant power, cooling, and connectivity. Moving to this facility will ensure 99.99% uptime for County systems, strengthen disaster recovery capabilities, and enhance physical security. The project also establishes a secondary Internet connection to improve network resilience. This redundancy supports critical systems including ERP and other SaaS applications—addressing a gap identified by Plante Moran during the County's initial IT assessment. Relocating to a Tier 3 environment provides enterprise-grade reliability without the cost of constructing a new County-owned data center.

Approval of CPO# 951209 will authorize the purchase of required hardware; Firewall Devices, Edge Switches, and Network Switches required to complete this migration.
