Emergency Management Update

Ed Flick, MPA
FEMA has a ‘blunt’ new message: It won’t be there for every future disaster

By Nicole Ogrysko @nogryskoWFED
April 4, 2018 5:32 pm  4 min read
OPINION

Salem residents not personally disaster-prepared

OPINION: Run on bottled water shows residents are not prepared for larger-scale emergencies.

What we do to respond

- Activate emergency / business continuity plans
- Establish communications and assess damage
- Clear critical routes
- Support trauma surge, hospital decompression and medical evacuations
- Return people to their homes ASAP, shelter everyone else
- Establish distribution of food, water, fuel
- Prevent cascading effects on at-risk and sheltered populations
- Receive external support
- Support emergency repairs on lifelines

Road Clearing Table Top Exercise March 20, 2017

- Marion County and City of Salem co-hosted
- Participants included local companies involved in:
  - Local road construction
  - Fuel distribution
  - Vehicle maintenance

- State Agencies
  - Oregon Dept of Transportation
  - Oregon Dept of Energy
  - Oregon Military Dept
  - Oregon Emergency Mgt
Marion County Primary Points of Distribution
And Tier 1 Priority Routes

Current as of April 2017
Fact Sheet

Public Assistance: Procurement Conducted Under Exigent or Emergency Circumstances

The Federal Emergency Management Agency (FEMA) Public Assistance (PA) Program provides supplemental assistance to states, territories, tribes, and local governmental entities, as well as certain private non-profit organizations (applicants) following major disasters and emergencies declared by the President. FEMA’s Public Assistance Program and Policy Guide (http://www.fema.gov/public-assistance-policy-and-guidance) provides comprehensive information regarding assistance that FEMA can make available, and the requirements that applicants must follow in order to receive the assistance. This Fact Sheet provides key information that non-state applicants need to consider when utilizing contracted resources under exigent or emergency circumstances.

Federal regulations (2 C.F.R. Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements For Federal Awards) establish requirements for non-state applicants concerning the exigency or emergency exception that permits the use of noncompetitive procurements, frequently referred to as “sole-source contracting.” These exceptions and associated procurement requirements are discussed further below. The information presented within applies to all categories of work under the PA Program. Emergency work funded under Category A (Debris Removal) and Category B (Emergency Protective Measures) is most often associated with a public exigency or emergency. However, there may be instances where exigent or emergency circumstances necessitate the use of noncompetitive procurements for permanent work (Categories C-G). The answers to the frequently asked questions below provide additional guidance on the acceptable use of noncompetitive proposals under exigent or emergency circumstances, which is described in regulation at 2 C.F.R. § 200.320(j)(2).

It is essential that all applicants understand that both FEMA and the U.S. Department of Homeland Security’s Office of Inspector General (OIG) closely review applicants’ procurement actions and contract selections, with a particular emphasis on noncompetitive procurement actions, to evaluate compliance with Federal requirements. Failure to follow federal contracting and procurement requirements puts applicants at risk of not receiving reimbursement for otherwise eligible disaster costs.

What is the exigency or emergency exception?
Non-state applicants must follow the procurement requirements found at 2 C.F.R. §§ 200.317 – 200.326. However, Federal regulations allow for noncompetitive procurements under certain circumstances, including when a non-state applicant determines that immediate actions required to address the public exigency or emergency cannot be delayed by a competitive solicitation. This represents an exception to requirements for full and open competition. FEMA approval is not required for use of noncompetitive procurements under the emergency or exigency exception; however, the use of noncompetitive procurements does not relieve non-state applicants from complying with other procurement requirements or from ensuring that costs are reasonable.

"FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards."

AGENDA

Date
March 20, 2018

Time
3:00pm-5:00pm

Location
Corban University, Psalm Performing Arts Center
5000 Deer Park Dr SE, Salem, OR 97317

- Welcome
  - Ed Flick
- Distribution Center: Hurricane Harvey
  - Tom O'Black
- What is the Cluster System?
  - Sue Romanski
- Site Orientation
  - Mike Roth
- Start Exercise
  - Community Resilience
  - Operational Coordination
  - Supply Chain Integrity and Security
- End Exercise
  - Until 5:00 - Debrief/Hot Wash
  - Questions/Comments

Thank you Corban University for hosting this event!!

Thank you for coming!

County Responsibilities

- County emergency management agencies have emergency response plans identifying mission critical functions for the county and a general approximation of the fuel needed to perform identified missions. This includes the cities, special districts, and regional governments within county borders. County plans should have a fuel annex or section in their plans that identifies:
  - Priority tier 1 roads the county will restore to support fuel deliveries and other disaster relief commodities.
  - Fuel Points of Distribution (FPOD) to receive emergency bulk fuel supplies.
  - Methods to deliver the fuel from the designated FPODs to critical facilities and to the emergency responders in the field.
