Considerations:

- *What is the purpose for the order? [list of voters, for a mailing, walking door to door, street index information, statistical research, etc.]
- *What “group” of voters do you need? [a particular district (legislative, city, fire, school, etc.), a party, a status, certain age group, etc.]
- *Do you need Residence address? Mailing address? Absentee address?
- *Is a special sort required? [by district, alpha, by precinct, by party, households only, walking list order, etc.]
- *What do you want produced? [a paper listing, paper gummed labels, data on a CD]
- *The standard format of data received on CD’s is: ASCII Tab delimited – this is a very common and usable format.
- * When will you need/use the data? [data changes daily, do you need the most current data?]
