

Early Assessment and Support Alliance (EASA) Marion County Referral Form

The following are guidelines to decide whom to refer to EASA. Clients that are a good fit for EASA have symptoms of psychosis consistent with schizophrenia spectrum conditions. Acceptance into the program will be based on further screening and assessment. Referents should explain to individuals that they are being referred for an assessment to determine whether EASA is a good fit for them and should continue to follow up with individuals referred until a decision regarding EASA is made.

Must meet all the following:

1. Reside in Marion County
2. Ages 12-27
3. The person has not received treatment for psychosis in the past 12 months
4. Psychotic symptoms are not related to substance abuse/use or a medical condition
5. Symptoms have caused significant decline in academic, vocational, social, or personal functioning (sleep/hygiene)

And must meet either item below:

6. The individual has experienced significant worsening or new symptoms in one or more of the following areas *in the last 12 months*:
 - *Thought disorganization as evidenced by disorganized speech and or/ writing. (Examples: confused conversations, not making sense, never getting to a point, unintelligible)
 - *Behaviors, speech, or beliefs are uncharacteristic and/or bizarre
 - *Complains of hearing voices or sounds that others do not hear
 - *The individual feels that other people are putting thoughts in their head, stealing their thoughts, believes others can read their mind (or vice versa), and/or hear their own thoughts out loud
 - *Episodes of depersonalization (Example: They believe that they do not exist or that their surroundings are not real)
 - *Heightened sensitivities (lights, sounds etc.) and/or is experiencing visual distortions
 - *Increased fear, anxiety, or paranoia for no apparent reason or for an unfounded reason

~OR~

Family history of a 1st degree relative (sibling or parent) with a major psychotic disorder

If the individual you are referring is in/an immediate danger to self or others, you will need to refer directly to the local crisis system. The crisis system will refer to EASA when the crisis resolves. To make a referral, call or fax a referral form to the EASA intake screener. Include all relevant assessments and releases of information.

Marion County Intake Coordinator: Elizabeth Coronado
Phone: 503-576-4690 Fax: 503-584-4837

List of additional contacts (family, guardians, treatment providers, and other supports):

1) Name: _____ Relationship: _____

Phone: _____ Contact this individual: YES NO

2) Name: _____ Relationship: _____

Phone: _____ Contact this individual: YES NO

Reason for referral (specific symptoms, onset, frequency, severity, and duration):

Cultural considerations that may impact screening and/or assessment:

Person's knowledge about and/or reaction to this referral:

Family history of psychotic illness:

Other services received prior to referral:

Living Situation at Referral

- With Family
- Alone
- Homeless
- Spouse
- Foster Parents
- Friends
- Group Home
- Dorm
- Juv. Detention
- Hospital-Medical
- Hospital-Psychiatric
- Residential Program
- Other: _____

Educational Involvement at Referral

- Not in school-Wants to go
- Not in school-Does not want
- Part-time GED
- Part-time school
- Part-time trade
- Completed school
- Full-time school
- Full-time trade

Last grade completed: _____ (count each year after high school as a grade)

Employment at Referral

- Not working – Does not want
- Not working – Wants to work
- Not working – Seeking work
- Working Part-time
- Working Full-time
- Not working age

Employment type at Referral

- Competitive
- Sheltered
- Volunteer

Insurance Status at admit (check all that apply)

- None
- Private: _____
Name of Insurance Company
- OHP
- Medicare

Frequently Asked Questions

*For information on EASA's services and who to contact for referrals please go to our website:

www.easacommunity.org

*For information on other the EASA programs visit:

<http://www.oregon.gov/DHS/mentalhealth/services/easa/main.shtml>

*You may also call 1-888-327-8817

How can I help make the referral go more smoothly?

Please fill out the referral form as completely as possible. It is not uncommon for the EASA Intake Coordinator to review medical and /or mental health documentation regarding the client's symptoms and status. If you have access to additional supportive documentation and can provide this to EASA, please do so with signed releases of information. This will move the process along more quickly. However, it is not necessary to have such documentation to make a referral.

What happens when I make a referral?

The EASA Intake Coordinator for the individual's county of residence will collect more information from you about the person's symptoms, history, and situation. At that point, the Intake Coordinator may want to complete a screening assessment with the individual and/or family. Our goal is to make sure that everyone referred to EASA receives the most appropriate treatment or recommendations. Our program will provide a careful screening, including an initial differential diagnosis process. EASA asks that if you are currently working with someone who is referred to EASA, continue to maintain your involvement until EASA has formally accepted the person into ongoing services. If it is determined that EASA is not a good fit for the individual, we will support the individual, family, and/or referent to identified resources that are more likely to be helpful.

When might EASA not accept someone who seems to fit the referral guidelines?

EASA is a specialty program focusing on individuals whose symptoms are consistent with the early stages of schizophrenia and related conditions. Several other conditions, such as ADHD, major depression, severe anxiety, or post-traumatic stress disorder can have symptoms similar to the early stages of a psychotic illness but require a different form of treatment and support. EASA tries to ensure that the clinical services the person receives are appropriate to that person. EASA does not accept individuals whose treatment needs are different than EASA's primary focus.

Does EASA accept people who are actively using illicit drugs?

We serve a population of young people who have symptoms of psychosis, and they may utilize illegal and legal substances, however, we will not automatically exclude or screen out those individuals as a result. *However*, if as part of the initial screening process, EASA learns that the drug use is the primary contributor to the current symptoms, the individual will be screened out and referred to more appropriate services.

Does EASA ever accept individuals over the age of 25 or under the age of 12?

Yes, EASA will consider accepting individuals into the program outside our age criteria if it is determined in the screening that all other criteria are met. However, EASA's focus is on serving the developmental needs of individuals in the transitional age range. To meet the needs of our current clients, EASA will not accept individuals significantly outside of our age criteria.

What if the person I want to refer is appropriate for EASA but does not want help?

EASA can be very flexible in working with the individual's support system to provide them with information and strategies for engaging the individual. EASA can also meet the client in an environment that is comfortable for them and engage them in a way that is not entirely focused on mental health treatment.

Will EASA accept people who are acutely psychotic?

Yes. However, if EASA feels the individual is at risk of harming oneself or others we may ask and/or assist in the individual receiving hospital care. If the client is appropriate for services, we will stay involved with the individual and the family throughout this episode.

Will EASA accept people who have been ill for longer than 12 months?

We recognize that it can take years for a serious mental illness to be diagnosed, and we will accept individuals who have had a lengthy "at risk" period prior to coming to the attention of mental health professionals. However, if an individual carries a diagnosis of a schizophrenia related illness for more than a year, they are likely not appropriate for EASA.

Will EASA accept someone who is developmentally delayed/disabled and experiencing psychosis?

We normally do not, as this individual would have special needs beyond EASA's treatment parameters and may be better served by the DD system.

What does it cost to be served by EASA? Does EASA take insurance?

EASA will bill insurance, whether OHP or private, for all applicable services. Our mission is to serve eligible individuals regardless of ability to pay, though we would ask people to do their best to pay for services rendered so that EASA can sustain its services into the future.

How long does it take someone to be accepted into EASA?

Once a referral form is received, the Intake Coordinator will typically contact the referent within two business days to begin the screening process. From there, the process can take anywhere from 1 day to several weeks depending on the information available, the acuity of the individual, and the availability of the individual and their support system. EASA will keep the referent informed of their progress throughout the screening process. You will be notified directly when the client is accepted. If the client is screened out, you will be notified by phone and/or letter.
