

Vaccination Status for Marion County

Data from the ALERT IIS as of December 12, 2021

The data in this report comes from the ALERT Immunization Information System (ALERT IIS), which is the immunization registry for the State of Oregon. The data includes *only* those people who are residents of Marion County, and not all vaccinations that take place within the county. Thus, these values will be slightly lower than reports from the state.

The table below shows the number of completed vaccinations and in-progress vaccinations by month and the percentage coverage in the total population (est. 349,120) and the adult (18 years of age and older) population (est. 263,496). Information on booster doses, provided to those individuals that are already fully vaccinated, is provided in another report.

Vaccine Administration by Month

	People Complete	People In-Progress	People vaccinated	% of total population with at least one dose	% of adults with at least one dose	Third doses administered
January	7,972	394	8,366	2%	3%	0
February	22,944	366	23,310	7%	9%	0
March	25,849	476	26,325	8%	10%	1
April	35,580	1,071	36,651	10%	14%	0
May	38,099	1,413	39,512	11%	14%	1
June	24,337	1,306	25,643	7%	7%	0
July	8,929	842	9,771	3%	3%	0
August	8,931	1,877	10,808	3%	3%	960
September	12,701	3,307	16,008	5%	5%	1,451
October	6,152	1,407	7,559	2%	3%	466
November	3,716	3,814	7,530	2%	2%	2
December	2,955	2,277	5,232	1%	1%	1
Grand Total	198,165	18,550	216,715	62%	74%	2,882

Cumulative Vaccine Administration

Vaccination Levels by Age Group

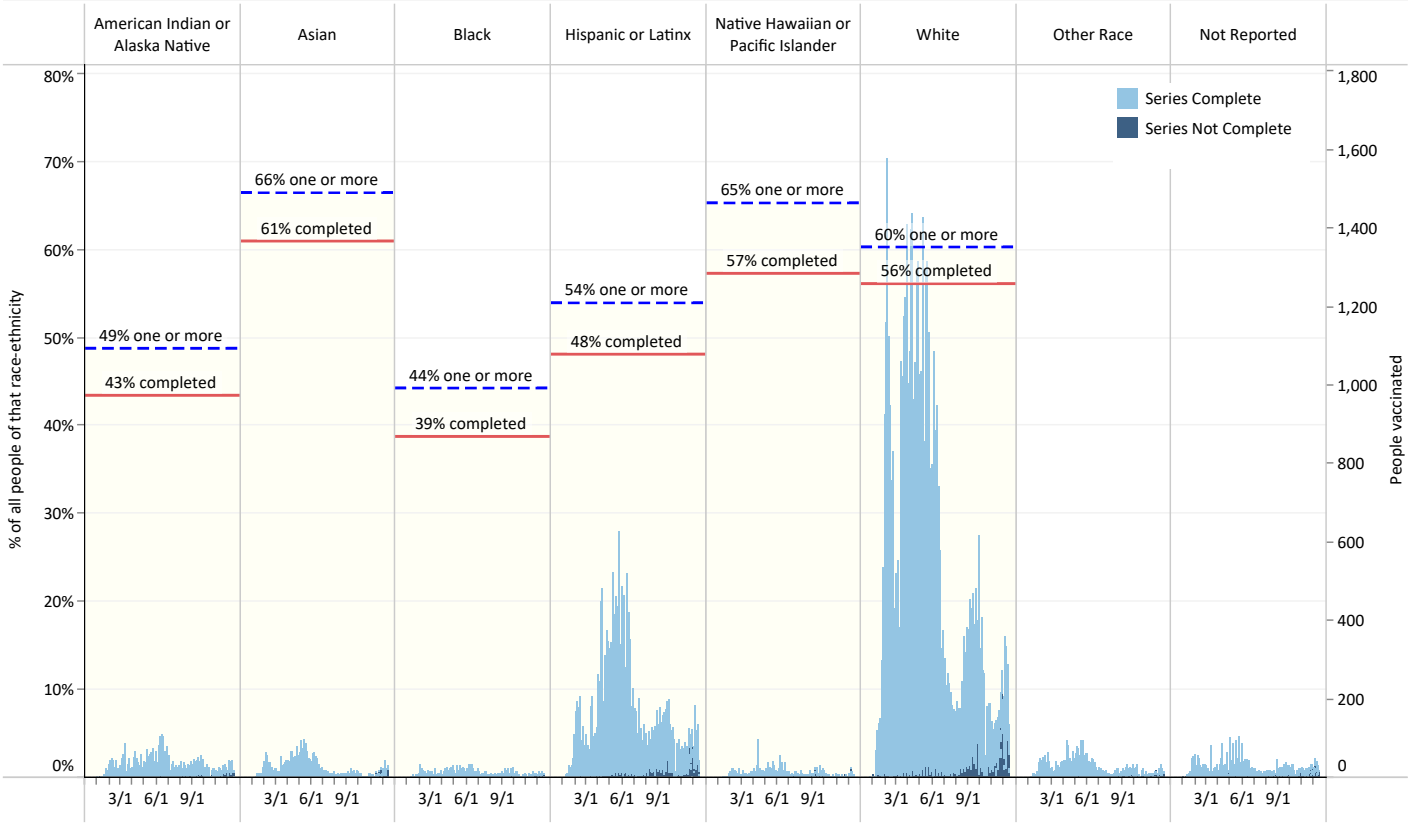

The first chart below shows the cumulative percentage of people vaccinated for each age group. The light blue bars are the daily number of people vaccinated; the darker bars are those in-process. Since those 60 and older have all exceeded the 80% vaccination threshold, this weeks report has aggregated these age groups so we can better see the trends in the remaining groups. The second chart shows the weekly percent change in vaccine uptake by age group. For all charts, the date used is the date of the most recent vaccination.

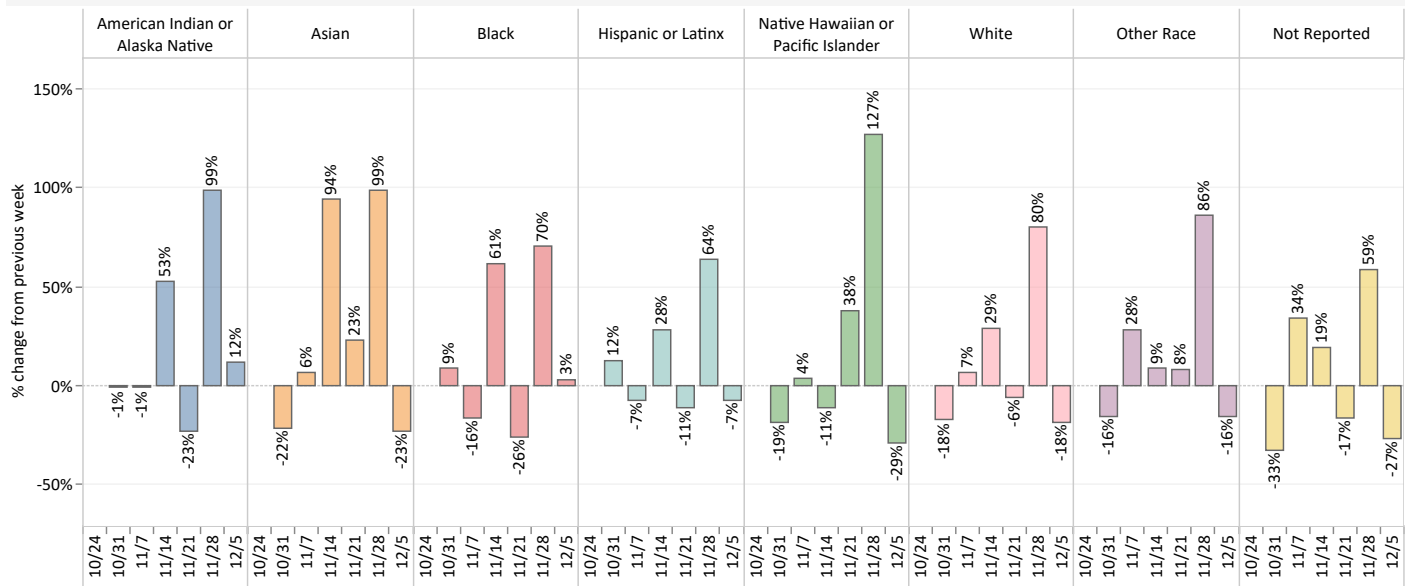

Vaccination Levels by Race-Ethnicity

Similar to the age chart on the preceding page, the first chart shows the cumulative percentage of people vaccinated for each race-ethnicity. Percentages are not shown for Other Race and Not Reported as there is no information on the total number of people in those groups. The second chart shows the weekly percent change in vaccine uptake by age group. For all charts, the date used is the date of the most recent vaccination.

Vaccination Status by Race-Ethnicity Category

Weekly percent change in vaccines administered (week of 10/24/2021 - 12/5/2021)

Zip Code Area

The charts below represent those zip code areas with a population greater than 10,000 people. The upper chart shows the percentage of people with at least one dose area and those that have completed their vaccination series. The second chart shows the weekly percent change in vaccination uptake by zip code. In all cases, the date is the date of the latest vaccination.

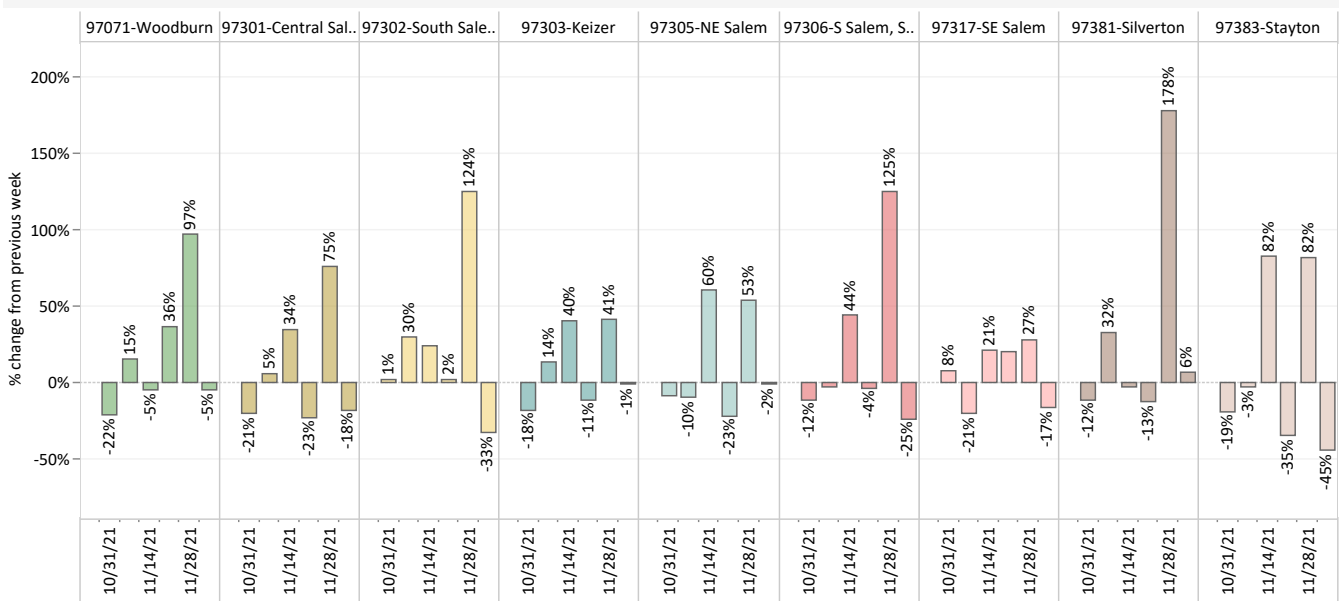

On the next page is a map showing the percent of the population that has at least one dose of vaccine, and the number of completed and in-progress vaccinations. Please note that several zip code areas extend beyond the county and so will underestimate the percent vaccinated. Other zip code data can be found on the OHA dashboard:
