• Mobile Units

There is still time to register for the free Oregon State Fire Marshall (OSFM) class that reviews the new fire and safety rules of the Oregon Fire Code. The last two classes of the year are below:

- **Eugene** - 10/12/23 8:00am-11:00am - Eugene Fire, Emergency Services Training Center – 1705 2nd Ave, Eugene OR 97402
- **Salem** - 11/16/23 8:00am-11:00am – OSFM, Mt Hood Conference Room – 3991 Fairview Industrial Dr SE, Salem OR 97302

Register [Here](#) or scan the QR Code on the right

• General Food Safety

Scented, No-Splash/Splash-less, and Laundry chlorines (bleach) are not safe for restaurant use. A 5-point violation may be cited if these are stored in the kitchen (*OAR 7-204.11*).

• Seasonal Pools

Now's the best time to prepare your pool for the winter. The steps you take now can make reopening your pool much easier in the spring:

- **Clean & vacuum the pool before closing it**
Debris left in the water or on the walls will only get worse over the winter
- **Test the water and balance chemicals**
A healthy pH and chlorine level can help reduce algae growth in the water, especially if temperatures are above 60° F.
- **Use a secure pool cover**
Covers help maintain pool chemistry and help keep out debris and pests.
