

Our thoughts are with the families and businesses affected by the devastating wildfires in our community. Republic Services and Coffin Butte Landfill understand the desire to clean up and begin the rebuilding process and we stand by to help.

Our top priority is the safety of our employees, customers and community.

Fire debris can contain many types of hazardous materials, including:

- Tiny particles of dust, dirt, and soot that can easily become airborne and inhaled;
- Toxic amounts of heavy metals including arsenic, cadmium, copper, lead and mercury;
- Asbestos; and
- Material such as propane tanks, air conditioners, batteries, cleaning products, pesticides, and herbicides that are hazardous or require special handling and disposal.

As a result, there are special requirements for transporting and disposing of wildfire debris.

Before entering any area impacted by wildfire, clearance from the appropriate governmental authorities supervising the fire remediation and cleanup process should be obtained, and any applicable procedures and guidelines followed. Any cleanup of fire impacted properties should be conducted by professionals who have the appropriate expertise for these activities. Anyone who is in an area impacted by fire should take a number of precautions. First and foremost, the area should be cleared of all fire and potential for fire recurrence and should be safe from unstable structures, hazardous materials, falling vegetation, open pipes, burning gas, propane tanks and other hazards. Appropriate personal protective equipment including N-95 masks, gloves, long shirts and pants, safety glasses and stout shoes should be worn. Appropriate procedures should be followed when leaving such an area, including potentially changing shoes and removing outer layers of clothing. Ash should not be disturbed to the greatest extent possible.

Remediation of property destroyed or damaged by wildfire can be dangerous and should be approached with caution. The area should be deemed safe by state and local authorities prior to remediation and cleanup activities. No wildfire debris should be transported for disposal unless it has been fully extinguished with no hot spots or risk of re-ignition.

Contact Coffin Butte Landfill, to determine whether disposal is allowed at the landfill.

The above information is subject to change based on additional guidelines imposed by governmental agencies supervising the fire and cleanup activities and also to changes that may be implemented by Coffin Butte Landfill in order to protect its employees and the environment or to comply with applicable laws, permits or due to operational considerations.

State of Oregon Department of Environmental Quality

Accredited Asbestos Inspectors

The following is a list of accredited inspectors who can provide asbestos surveys required by DEQ regulation [OAR 340-248-0270](#). Please see the [Asbestos Survey Factsheet](#) which outlines requirements for each survey. This is not a complete list of all accredited asbestos inspectors in Oregon. If you are an accredited asbestos inspector and would like to be included on this list, please contact the DEQ [asbestos coordinator](#).

DEQ cannot guarantee that the inspectors listed on this form have maintained their accreditation. Customers should verify the inspector's credentials by requesting a copy of the inspector's AHERA certification and ensuring that it has not expired. Services provided and costs are determined solely between the inspector and the customer. Including an inspector's name on this list does not constitute an endorsement by DEQ.
