Submittal Checklist

Marion County Stormwater Quality Treatment Application Submittal Checklist

This checklist is used to ensure the submittal of all required documentation for an application to construct a stormwater quality treatment facility under a Marion County Public Works Permit.

Submittal By: Project Address: Submittal package includes the following required components: 1) Site Assessment Checklist 2) Complete Drainage Submittal Package, including: A) Plan Set B) Temporary Erosion and Sediment Control (TESC) Plan C) Landscape Plan D) Existing Site Stormwater Drainage Plan D) Existing Site Stormwater Drainage Plan F) Supporting Data, including Stormwater Management Report G) O&M Manual Additional materials being submitted as required when: Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report A proprietary device is proposed: Required information for proprietary facilities Steep slopes or shallow groundwater exist: Geotechnical Report Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis Additional Comments:		Г			
□ 1) Site Assessment Checklist 2) Complete Drainage Submittal Package, including: □ A) Plan Set □ B) Temporary Erosion and Sediment Control (TESC) Plan □ C) Landscape Plan □ D) Existing Site Stormwater Drainage Plan □ E) Proposed On-site Stormwater Drainage Plan □ F) Supporting Data, including Stormwater Management Report □ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis	Submittal By:		Project Address:		
2) Complete Drainage Submittal Package, including: A) Plan Set B) Temporary Erosion and Sediment Control (TESC) Plan C) Landscape Plan D) Existing Site Stormwater Drainage Plan E) Proposed On-site Stormwater Drainage Plan F) Supporting Data, including Stormwater Management Report G) O&M Manual Additional materials being submitted as required when: Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report A proprietary device is proposed: Required information for proprietary facilities Steep slopes or shallow groundwater exist: Geotechnical Report Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis	Submittal package includes the following required components:				
 □ A) Plan Set □ B) Temporary Erosion and Sediment Control (TESC) Plan □ C) Landscape Plan □ D) Existing Site Stormwater Drainage Plan □ E) Proposed On-site Stormwater Drainage Plan □ F) Supporting Data, including Stormwater Management Report □ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	☐ 1) Site Assessment Checklist				
□ B) Temporary Erosion and Sediment Control (TESC) Plan □ C) Landscape Plan □ D) Existing Site Stormwater Drainage Plan □ E) Proposed On-site Stormwater Drainage Plan □ F) Supporting Data, including Stormwater Management Report □ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis	2) Complete Drainage Submittal Package, including:				
 □ C) Landscape Plan □ D) Existing Site Stormwater Drainage Plan □ E) Proposed On-site Stormwater Drainage Plan □ F) Supporting Data, including Stormwater Management Report □ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	☐ A) Plan Set				
 □ D) Existing Site Stormwater Drainage Plan □ E) Proposed On-site Stormwater Drainage Plan □ F) Supporting Data, including Stormwater Management Report □ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	\square B) Temporary Erosion and Sediment Control (TESC) Plan				
 □ E) Proposed On-site Stormwater Drainage Plan □ F) Supporting Data, including Stormwater Management Report □ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	☐ C) Landscape Plan				
 □ F) Supporting Data, including Stormwater Management Report □ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	☐ D) Existing Site Stormwater Drainage Plan				
□ G) O&M Manual Additional materials being submitted as required when: □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis	E) Proposed On-site Stormwater Drainage Plan				
Additional materials being submitted as required when: Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report A proprietary device is proposed: Required information for proprietary facilities Steep slopes or shallow groundwater exist: Geotechnical Report Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis	F) Supporting Data, including Stormwater Management Report				
 □ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	☐ G) O&M Manual				
 □ A proprietary device is proposed: Required information for proprietary facilities □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	Additional materials being submitted as required when:				
 □ Steep slopes or shallow groundwater exist: Geotechnical Report □ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis 	☐ Infiltration limits retention: Infiltration Testing Report in Stormwater Management Report				
☐ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis	☐ A proprietary device is proposed: Required information for proprietary facilities				
	Steep slopes or shallow groundwater exist: Geotechnical Report				
Additional Comments:	☐ Creating or replacing 1 or more acres of impervious surfaces: Qualitative Downstream Analysis				
	Additional Comments:
