

Chapter 17.136
EFU (EXCLUSIVE FARM USE) ZONE

17.136.060 Conditional use review criteria.

The uses identified in MCC 17.136.050 shall satisfy criteria in the applicable subsections below:

A. The following criteria apply to all conditional uses in the EFU zone:

1. The use will not force a significant change in, or significantly increase the cost of, accepted farm or forest practices on surrounding lands devoted to farm or forest use. Land devoted to farm or forest use does not include farm or forest use on lots or parcels upon which a non-farm or non-forest dwelling has been approved and established, in exception areas approved under ORS 197.732, or in an acknowledged urban growth boundary.
2. Adequate fire protection and other rural services are, or will be, available when the use is established.
3. The use will not have a significant adverse impact on watersheds, groundwater, fish and wildlife habitat, soil and slope stability, air and water quality.
4. Any noise associated with the use will not have a significant adverse impact on nearby land uses.
5. The use will not have a significant adverse impact on potential water impoundments identified in the Comprehensive Plan, and not create significant conflicts with operations included in the Comprehensive Plan inventory of significant mineral and aggregate sites.

B. Non-Farm Dwellings. The following additional criteria apply to non-farm dwelling requests:

1. The dwelling will be sited on a lot or parcel that is predominantly composed of Class IV through Class VIII soils that would not, when irrigated, be classified as prime, unique, Class I or Class II soils. Soils classifications shall be those of the Soil Conservation Service in its most recent publication, unless evidence is submitted as required in MCC 17.136.130.
2. The dwelling will be sited on a lot or parcel that does not currently contain a dwelling and was created before January 1, 1993. The boundary of the lot or parcel cannot be changed after November 4, 1993, in any way that enables the lot or parcel to meet the criteria for non-farm dwelling.
3. The dwelling will not materially alter the stability of the overall land use pattern of the area. In making this determination the cumulative impact of possible new non-farm dwellings on other lots or parcel in the area similarly situated shall be considered. To address this standard, the following information shall be provided:
 - a. Identify a study area for the cumulative impact analysis. The study area shall include at least 2,000 acres or a smaller area not less than 1,000 acres, if the smaller area is a

distinct agricultural area based on topography, soil types, land use pattern, or the type of farm or ranch operations or practices that distinguish it from other, adjacent agricultural areas. Findings shall describe the study area, its boundaries, the location of the subject parcel within this area, why the selected area is representative of the land use pattern surrounding the subject parcel and is adequate to conduct the analysis required by this standard. Lands zoned for rural residential or other urban or nonresource uses shall not be included in the study area;

b. Identify within the study area the broad types of farm uses (irrigated or nonirrigated crops, pasture or grazing lands), the number, location and type of existing dwellings (farm, non-farm, hardship, etc.), and the dwelling development trends since 1993. Determine the potential number of non-farm dwellings that could be approved under MCC 17.136.050(A), including identification of predominant soil classifications and parcels created prior to January 1, 1993. The findings shall describe the existing land use pattern of the study area including the distribution and arrangement of existing uses and the land use pattern that could result from approval of the possible non-farm dwellings under this provision;

c. Determine whether approval of the proposed non-farm dwellings together with existing non-farm dwellings will materially alter the stability of the land use pattern. The stability of the land use pattern will be materially altered if the cumulative effect of existing and potential non-farm dwellings will make it more difficult for the existing types of farms in the area to continue operation due to diminished opportunities to expand, purchase, or lease farmland, or acquire waste rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.

C. Home Occupations. ~~Notwithstanding MCC 17.110.270 and 17.120.075, home occupations, including the parking of vehicles in conjunction with the home occupation and bed and breakfast inns, are subject to the following criteria:~~
