Marion County Sheriff's Office

Community Corrections

Programs & Services 2025-2027

The Marion County Sheriff's Office (MCSO) continually strives toward excellence. Excellence demands the effective use of available resources and seeks new ways to enhance service delivery within our community. Our resources include budgeted funds, equipment, buildings, and contracted programming. However, our most valuable resource is our employees. The Marion County Sheriff's Office has employees and volunteers who are exceedingly dedicated, well-trained, and respond creatively to all demands.

Administration

The Administration provides oversight and coordination across the supervision and program areas of the Community Corrections Division. A Commander leads the division and is responsible for strategic direction, inter-agency coordination, and overall performance.

Lieutenants report to the Commander; they supervise Sergeants, a Senior Office Manager and program coordinators. A Lieutenant oversees daily operations, such as training, hiring, and policy development; another oversees programs such as mental health services, prison diversion, prison re-entry, and treatment-related programs. A Senior Office Manager supervises the support services units, including records, reception, and the fee unit.

The division has transitioned from a directive-based model to one that uses evidence-based practices in supervision and delivery. Administration staff work with system partners to develop public safety policy, coordinate funding efforts, and meet contractual requirements with the Oregon Department of Corrections, including outcome reporting and compliance monitoring.

Support Services

Support Services assist in the daily functions of Community Corrections.

Reception staff are the initial point of contact for clients, visitors, and community members. They process reports, route information, and ensure that adjudicating authorities receive sanctions and warrants in a timely manner.

Records staff open and close case files, update abscond status, and track client activity in the operational time system.

The Fee Unit processes client payments and sends restitution billing, supporting accountability and the financial obligations imposed by the court or supervision agreements.

Mental Health /Evaluation Specialist

Mental health services are provided by a Mental Health and Evaluation Specialist who holds a Master's degree and is certified as a Qualified Mental Health Professional. These services support clients transitioning from incarceration to the community, as well as those currently on probation, parole, or post-prison supervision. The specialist delivers case

management/supervision strategy consultations, psychiatric evaluations, assessments, diagnoses, treatment referrals, transition planning, service coordination, and medication support.

Program Coordinators

Program Coordinators facilitate complex reentry programs by researching, planning, designing, implementing, and evaluating their effectiveness and compliance in evidence-based practices. They monitor and seek reentry resources in the community to enhance client service quality. Additionally, they assist Community Corrections staff and clients with basic needs purchases (e.g., bus passes, clothing, IDs) per Marion County Reentry Initiative guidelines, as well as referrals to community resources such as housing, treatment, employment, and education.

Case Aides

Case Aides assist deputies with a variety of duties related to the supervision and management of clients on supervision. They conduct interviews, prepare reports, maintain chronological case histories, provide general operations support, and other duties as assigned under the direction of certified Community Corrections Deputies.

Community Corrections Deputies (POs)

Community Corrections Deputies provide supervision to clients in Marion County to enhance public safety, enforce court orders, and hold clients accountable. A variety of statutory, policy, and contractual mandates are satisfied such as sex offender notification, supervision of clients sentenced to one year or less in local jails, transitional pre-release assessment and planning, hearings, and pre-sentence investigations. Community Corrections staff work closely with other community agencies such as Treatment Providers, various Law Enforcement agencies, Transitional Housing Providers, and other stakeholders to coordinate services and support community safety and client success.

Our goal in Community Corrections is to provide evidence-based programs, custody/sanctions, and other support services that will make the most effective use of available resources to protect the public and promote the reformatory process. Further, we strive to enhance the integrity of the law and implement and maintain programs and efforts geared toward empowering the client to become a contributing member of the community.

Community Corrections Strategic Plan

Over the past year, Community Corrections has made significant progress across multiple strategic goal areas, reflecting our commitment to fostering a professional, service-oriented, and community-connected division. The following highlights our achievements in alignment with key objectives:

Goal: Strengthening Organizational Culture

To ensure a high level of professionalism and customer service, we began a comprehensive review and redesign of the Field Training and Evaluation Program (FTEP).

Planned enhancements include a competency-based testing component and expanded, ongoing Field Training Officer (FTO) training, with added focus on civil rights and field operations.

Additionally, we are continuing our tradition of conducting annual client surveys, with the 2025 iteration currently underway, to gain valuable feedback that informs service delivery.

Our annual Pretrial, Probation, and Parole Supervision Week BBQ—featuring peer-nominated staff awards—continues to foster camaraderie, appreciation, and a positive work environment.

Goal: Enhancing Recruitment and Community Involvement

Our team continues to maintain a strong presence in the community and actively supports recruitment efforts. Staff regularly participate in hiring events and recruitment campaigns to help attract new team members.

Team members are visible at a wide range of community events, including parades, job fairs, and faith-based outreach programs. We also take part in local fundraisers and initiatives that highlight the importance of re-entry support for individuals returning to the community. In addition, our leadership actively engages with community organizations and boards to strengthen partnerships and collaboration.

Goal: Promoting Staff Health and Wellness

We are proud to maintain a strong peer support team who provides accessible support across our workforce.

Enhancements to our physical environment—such as the new mother's room and wellness room at the Public Safety Building (PSB) - promote self-care and wellness.

The Community Corrections break room is equipped with games, comfortable seating, and refreshments to foster decompression and build team relationships. These initiatives are supported by an annual wellness budget that funds team-building events, meals, and

wellness awards, reflecting our holistic approach to employee care.

Goal: Assessing and Aligning Service Needs

To better match services to client needs, we hired a new Program Coordinator and completed a comprehensive inventory of current service providers, with a process now in place for regular updates.

We have received new requests from Batterer Intervention Program (BIP) providers interested in providing BIP services in Marion County. Those who are eligible will complete an application and approval process as directed by the Marion County BIP standards.

Goal: Leveraging Sheriff's Office Programs and Partnerships

We continue to collaborate meaningfully with other Sheriff's Office initiatives. A dedicated PO has been assigned to the RESTORE Court, actively participating in its development.

Goal: Coordinating Internal Services

Recognizing the value of specialized intervention, we expanded the Special Services Unit (SSU). This new addition strengthens our coordination with community agencies and enhances support for individuals with complex behavioral needs, including gang-involved populations.

Goal: Supporting Advancement and Retention

We successfully launched our Acting in Charge (AIC) program. Following a competitive selection process, the first AICs were appointed and now operate under a newly developed manual and protocol.

In support of professional development, we've restructured training to include monthly survival-skills sessions in both practical and classroom formats, aiming for shorter, more frequent sessions that increase retention and skill confidence. We're also mapping out voluntary lunchtime training blocks and enhancing cross-role exposure by involving non-sworn staff in scenario-based training, followed by inclusive debrief sessions.

Ongoing Strategic Planning

To build on this momentum, we are in the process of formalizing a strategic planning team composed of staff already engaged in advancing these goals. This group will help shape the roadmap for continued progress and organizational growth.

Supervision

Over the last twenty years, the Community Corrections Division has embraced Evidence-Based Practices (EBP) as a key, guiding philosophy to deliver supervision services to our client population and implement many program elements to transition toward EBP. Both line staff and management have been trained in Professor Edward Latessa's (University of Cincinnati) "what works" research and implement techniques to enhance client motivation and risk reduction.

The Community Corrections Division also provides client supervision with staff trained in the model of Effective Practices in Community Supervision (EPICS) to further enhance our EBP implementation. Additionally, the division has continued to embrace the George Mason Risk Need Responsivity (RNR) tool and the Correctional Program Checklist (CPC), to assess and determine how closely our contract treatment programs meet known principles of effective intervention. Internally, our EBP implementation has focused our efforts on three key principles:

The Risk Principle: Clients who pose a higher risk of continued criminal conduct receive the most intensive correctional treatments and programming. This principle is addressed through the division's use of the Level of Service/Case Management Inventory (LS/CMI)

and the Women's Risk/Needs Assessment (WRNA), validated risk and needs assessments, which determine who our highest risk clients are. Deputies and Case Aides have been trained in the use of these assessments, which are utilized during the pre-release transition process, the initial intake process, and field supervision.

The Need Principle: Staff and treatment programs target crime-producing needs which are highly correlated with criminal conduct, such as antisocial peer associations, antisocial values and beliefs, substance use, lack of problem-solving and self-control skills. These needs areas are identified using the LS/CMI and WRNA and are addressed with cognitive behavioral interventions and other skill-building techniques associated with the EPICS model of supervision, with the Pathways model applied specifically for our clients to provide gender-responsive cognitive interventions.

The Responsivity Principle: Is the way in which supervision and correctional programs should target those known risk and need factors, utilizing interventions and programs that are behavioral in nature. POs and Case Aides have been trained in the use of Motivational Interviewing (MI), a client-centered communication technique designed to elicit behavior change by helping clients explore and resolve ambivalence. Clients who are identified as ready to change receive a direct treatment referral to appropriate intervention programs as needed. Community Corrections caseloads are organized by risk level, crime type, and geographic region to build stronger community connections. Specialized units focus on the following different types of caseloads:

Intake Services – Designated POs meet with clients newly released from court, jail, or prison to complete an intake process. The purpose of the intake process is to:

- Orient and explain the assessment process and to assure the client has a clear understanding of the expectations of being on supervision.
- Assess each client's readiness for change with the URICA assessment.

General Supervision Unit (GRU)- This unit manages individuals on parole, post-prison supervision, and probation for offenses such as illegal drug possession, property crimes, and non-domestic person-to-person crimes (excluding domestic violence and sex offenses). To better serve clients and communities, the General Supervision Unit operates from multiple offices throughout the county. POs provide supervision tailored to each client's risk, need, and responsivity factors, focusing resources on those at the highest risk to reoffend.

The Family Sentencing Alternative Program (FSAP) – FSAP serves custodial parents facing either a presumptive prison sentence or probation with a stipulated prison sentence. Recognizing the traumatic impact that incarceration of a parent can have on families, caregivers, children, and spouses, FSAP provides wrap-around treatment, mentoring, and employment services to address the underlying drivers of criminal conduct. The program's primary focus is to preserve family unity and stability by diverting children from foster care; reduce prison bed usage by allowing for community supervision that safely manages and holds clients accountable; and decrease recidivism by providing services that lower the likelihood of future criminal behavior.

Domestic Violence (DV) Unit - The DV Unit supervises clients on parole, post-prison supervision, or probation for domestic violence-related crimes. This team of POs was formed to coordinate supervision and intervention efforts in an attempt to reduce the alarming incident rate of domestic homicide and domestic violence. Assessment of risk (based on the PSC, LS/CMI and ODARA assessment tools) is a key component in the case management process to ensure finite supervision resources are focused on clients who pose the greatest risk to their victims and the community. The unit has incorporated a limited supervision caseload that report via an internet-based web portal or US mail. A Case Aide is assigned to oversee these cases and monitor compliance. These clients are screened for new law violations and behavior that constitutes a public safety threat. Clients in the low-risk category are still held accountable for violations. The DV Unit works closely with local law enforcement, batterer intervention programs, victim services, and other service agencies to enhance public safety and hold clients accountable.

Sex Offender (SO) Unit - This specialized unit is responsible for the supervision high and medium-risk sex offenders on field caseloads as well as low-risk sex offenders currently being supervised on a limited supervision caseload. This team is comprised of POs, a Case-Aide, sex offender treatment providers, and polygraph examiners, Marion County Victim Services, and the Sex Crimes Team of the Marion County District Attorney's Office. This team works in collaboration with law enforcement agencies, child welfare, schools, local neighborhood associations and the community as a whole, in an effort to end further victimization by reducing sexually offending behavior.

Special Services Unit (SSU)- SSU targets evidence-based supervision strategies toward our highest-risk clients. This unit supervises clients with gang affiliation as well as a subset of the criminal population that have displayed tendencies toward violence, egocentricity, impulsivity, manipulation, and have significant deficits in expressing empathy or remorse. This unit maximizes division resources by employing validated risk assessments and utilizing cognitive-behavioral interventions and social learning techniques aimed at containing violence, reducing future criminal behavior, and increasing public safety. SSU strongly collaborates with area law enforcement agencies, has increased field contacts, works non-traditional hours, imposes curfews, and incorporates electronic monitoring in order to better accomplish these objectives. This unit is also responsible for compliance with statutory mandates for the supervision of Sexually Violent Dangerous Offenders, community notification, residency restrictions and other legislative requirements.

Limited Supervision Unit (LSU)- LSU is responsible for monitoring approximately 870 clients classified as low or limited risk per the PSC and/or the LS/CMI or WRNA. Clients are monitored for new law violations and behavior that constitutes a public safety threat. Appropriate action on violations may include a report to the releasing authority, incarceration, intermediate sanctions, or an increased level of supervision. Clients are moved from the unit for behavior that threatens public safety as defined by set guidelines. Working in collaboration with our victim services, LSU also monitors restitution payments to the Courts.

Gender Responsive Unit (GRU)- GRU supervises female clients across Marion County. The goal of this unit is to address the specific needs and experiences of women involved in the criminal justice system, which often includes a history of trauma, abuse, and gender-based discrimination. By adopting a gender-responsive approach, the POs in this unit aim to recognize and account for these factors by tailoring interventions and support to address their individual circumstances. Additionally, trauma-informed care acknowledges the potential impact of trauma on female clients' lives and strives to create a safe and supportive environment that promotes healing and recovery. The POs are trained in the WRNA and the Pathways model of supervision to address gender responsive needs and have a trauma informed approach. The goal is to empower women, reduce recidivism rates, and promote successful reintegration into society, ultimately fostering positive outcomes for both the individuals and the community. POs work collaboratively with community partners such as the Oregon Department of Human Services (DHS) to address client areas of need, including substance use treatment, parenting education, and other services and interventions designed to reduce the client's risk of recidivating.

1145 (Local Control) Unit – This unit works with felony AICs (Adults in Custody) sentenced to the DOC for one year or less or released to a reduced custody status. Staff assigned to this unit monitor and develop release plans for every client, approximately 10 each month, sentenced to the custody of the Marion County Local Supervisory Authority with a period of post-prison supervision. They also coordinate transfers to other counties, participate in case staffing to establish appropriate supervision conditions, make recommendations and supervise clients in non-custody alternatives, track release dates, and monitor Local Control AICs lodged in other facilities. This unit is also responsible for data entry in both the state and county computer systems.

Marion County SB416 Alternative Program (SB416)- The Marion County Sheriff's Office, in partnership with the Marion County District Attorney's Office and Bridgeway Community Health, constructed the SB 416 program to develop and implement evidence-based strategies to improve the supervision of probationers and reduce recidivism. The program focuses on prison-bound people who commit nonviolent drug and property crimes. The mission of SB 416 is to reduce recidivism, protect the public, and hold clients accountable by providing intensive community supervision and case management, substance use treatment programming, and mentoring services, as well as direct access to employment services, housing, education, and transportation.

Downward Departure Unit - Marion County provides intensive supervision services to individuals receiving downward dispositional departures in lieu of a prison sentence and who are ineligible to participate in the SB416 program. The goal of these caseloads is to utilize evidence-based strategies to improve the supervision of probationers and reduce recidivism. Supervising individuals on the downward departure caseloads frees up prison beds for high-risk clients who present the greatest threat to the community and allows for community supervision to safely manage and hold clients accountable in the community by providing services that will reduce the likelihood of future criminal behavior. All program participants receive an appropriate level of case management that ensures coordinated delivery of client services. Program participants receive evidence-based cognitive and motivation programming as well as referrals to any relevant community treatment programs. The PO utilizes information from assessments to create a unique case plan tailored to each client, which will reduce the likelihood of future criminal activity. The PO focuses on developing rapport, utilizing a structured program of positive and negative reinforcement, and cognitive behavioral interventions intended to teach the participant social skills, problem-solving skills, and techniques to target and change risky thinking. Over time, the PO teaches the participant skills to help them avoid antisocial peers and high-risk situations as well as general life skills. These interventions are designed to help the participant reduce their risk of future criminal activity.

Drug Court – The Drug Court program is voluntary, and it provides a collaborative multi-system approach. Participants may be pre- or post-adjudication and referrals are primarily received from the District Attorney's Office and the Marion County Sheriff's Office. Drug Court provides intensive supervision in the community with weekly court appearances, PO visits, and several substance use treatment sessions each week.

Mental Health Court – Represents an effort to increase effective cooperation between the mental health treatment system and the criminal justice system. Individuals considered for this program have a mental illness and are at risk of incarceration due to committing a misdemeanor or low-level felony crime in connection with their illness. The Mental Health Court team consists of members of the Court, Community Corrections and Treatment Providers. Participants receive intense supervision with court appearances, visits with the PO and treatment providers.

Veterans Treatment Court– Offers eligible veterans with access to an alternative treatment and sentencing program for those facing criminal charges related to underlying substance use and/or mental health concerns. This collaborative team approach is utilized to assist veterans willing to make changes in their life using evidence-based approaches. Veterans Treatment Court provides intensive supervision in the community with court appearances, visits with the PO, and several substance use treatment sessions every week.

RESTORE Court – In partnership with the Marion County District Attorney's Office, Marion County Circuit Court, and local treatment providers, this specialty court focuses on property offenders who owe restitution and struggle with substance use addiction. The program combines accountability with support by requiring clients to participate in substance use treatment and complete community service through a Marion County work crew. These efforts allow clients to make meaningful payments toward restitution while addressing the underlying issues that contribute to criminal behavior.

Community Restoration Monitoring – In partnership with Marion County Adult Behavioral Health, this program provides support to individuals who do not meet the criteria for placement at the Oregon State Hospital but still require aid and assistance services. A PO helps ensure clients attend appointments and court hearings, while also monitoring and reporting their compliance with court-ordered obligations. This collaborative approach promotes accountability, supports client stability, restoration, and assists the court in making informed decisions.

Transitional Services Unit (TSU)– Marion County Community Corrections has multiple resources available for clients releasing from prison by providing services that begin before release and continue into the community. These services are designed to help clients reintegrate into the community and meet supervision requirements.

Reach-ins -

Parole and probation officers (POs) meet with all clients releasing to Marion County approximately six months prior to their release date. These 'reach-ins' are used to share information, assess needs, build rapport, and begin planning for a successful transition back to the community. At times, staff from partner agencies also conduct reach-ins, which supplement the PO's engagement. The goal is to ensure clients are connected with support and resources before leaving prison.

Alternative to Incarceration Program (AIP) Supervision - Clients who complete the Oregon Department of Corrections' Alternative to Incarceration Program (AIP) are released to transitional leave and receive a telephonic reach-in from a Transitional Services PO to begin the transition process. After release, they are supervised in the appropriate unit, assessed using the LS/CMI or WRNA, and connected to services based on an individualized case plan.

Short-Term Transitional Leave (STTL)- Clients who meet the eligibility criteria for Short-Term Transitional Leave (STTL) may be released from prison up to 120 days prior to their official discharge date. Marion County Community Corrections supervises these individuals in the community to support a safe and successful transition. Supervision focuses on securing stable housing, obtaining employment, and connecting clients with treatment and other community-based services that reduce the risk of reoffending. This structured approach helps clients reintegrate into the community while maintaining accountability and promoting public safety.

Student Opportunity for Achieving Results (SOAR) - SOAR is a 12-week reentry program designed to promote stability, structure, and enhanced supervision for individuals transitioning back into the community. The program offers a comprehensive approach that includes cognitive-based programming, substance use treatment, transitional and case planning, employment support, subsidized housing when needed, and referrals to social and educational services tailored to each participant's unique needs and circumstances.

Participants in the SOAR program are recognized as students of Chemeketa Community College, integrating educational opportunities with rehabilitative support. This collaborative initiative was developed through a partnership between the Community Corrections Division of the Marion County Sheriff's Office, Chemeketa Community College, and Marion County Health and Human Services.

SOAR is committed to empowering individuals by providing them guidance, tools, and encouragement necessary to foster self-management, personal growth, and long-term well-being.

Additional Supervision Components

Field Training and Evaluation Program (FTEP) – The purpose of FTEP is to provide effective and efficient training for Community Corrections Deputies in Marion County. Newly hired deputies will undergo a phased training program over the course of six to nine months. It is designed to provide maximum opportunity for a new hire to learn the standards, policies, and practices and apply their knowledge in a practical setting while being evaluated by a Field Training Officer (FTO). All FTOs are certified by the Department of Public Safety Standards and Training (DPSST) and chosen through a selection process for their professionalism, efficiency, and ability to use effective communication to impart wisdom and knowledge effectively, using multiple methods of instruction.

Hearings - Assigned staff conduct due process hearings on clients accused of violating the conditions of parole, post-prison supervision, and clients under the Interstate Compact. Hearings staff make their recommendations to the supervising authority, consistent with office policies and the administrative sanctions grid, and as outlined in the Parole Board Administrative Rules or the Interstate Compact Agreement.

Interstate Compacts - Clients on supervision who wish to relocate to another state must meet specific criteria to be eligible for compact transfer. A designated Compact Coordinator receives requests from clients on supervision in Marion County and from out-of-state agencies to oversee the lawful interstate transfer of clients, and timely notification to victims and jurisdictions where compact clients are authorized to travel or relocate.

Pre-sentence Investigations (PSI) Unit- The PSI Unit provides the sentencing court with accurate, timely and relevant data to aid the sentencing judge in determining the most appropriate sentencing alternative for the client. PSI reports are consistent with this division's operating principles with regard to risk and sentencing guidelines. Whenever possible, victims are given an opportunity for input either in person or by correspondence.

Pretrial Release Program - The goal of the Pretrial Release Program is to promote future court appearances, enhance public safety, and provide the Court with practical, risk-based monitoring and support options for defendants that require oversight while pending adjudication. The program model is based on the National Association of Pretrial Services Agencies (NAPSA) evidence-based standards on pretrial release. Key elements of pretrial monitoring include utilizing risk assessments to make informed decisions; using the least restrictive interventions needed to promote pretrial success; notification of upcoming court appearances; informing the Court of new arrests, or defendant conduct, that may justify modification of conditions; and monitoring defendants' compliance with court-ordered conditions. Pretrial monitoring is individualized and tailored to a defendant's assessed risk levels and risk factors. It is specifically designed to promote court appearances and enhance public safety.

Before being placed in the Pretrial Release Program, defendants are evaluated to determine if they are appropriate for release. Following the release investigation, program staff make a recommendation to the Court as to whether a defendant is appropriate for release to the community based on several variables: including public safety risk, flight risk, and the presence of any protective factors (e.g., stable housing, employment, community ties, awareness of substance use issues, etc.). If a defendant is determined to be eligible for the Pretrial Release Program, staff also make a recommendation as to the level of pretrial monitoring the defendant should be held to. Defendants are monitored through a combination of phone contacts, office appointments, and electronic monitoring. Defendants are monitored from the time of release until the criminal case is resolved. While in the Pretrial Release Program, staff encourage clients to seek needed community resources such as substance use treatment, stable housing, and signing up for insurance (Oregon Health Plan, etc.).

Sanctions

Sanctions are structured responses to violation behavior. Community Corrections apply sanctions that are proportionate and appropriate to the violation. When paired with incentives, rehabilitation programs, and risk assessments, these sanctions promote accountability, support positive behavior change, and reduce the likelihood of future anti-social behavior. Effective sanctions are tailored to the individual and the specific conduct they are intended to address, ensuring a balanced approach that supports both reformation and community safety.

Jail - The purpose of the Marion County Jail is to ensure public safety and hold individuals accountable through secure detention. It is also a holding place for clients serving sanctions, revocations, pending parole violations, and new charges.

Community-Based Custodial Alternatives - Several intermediate sanction options are available for clients on probation, parole, and post-prison supervision. Community-based sanctions are offered as a jail alternative and include:

- Electronic monitoring - This program is managed by a Case Aide and allows POs to increase surveillance for higher-risk clients. It is also used by local courts for defendants awaiting trial and for sentenced individuals.
- Day Reporting. This program enhances client accountability and provides access to referrals and resources offered through the Pathfinder Network resource center.

Incentives

Evidence-based practices show that incentives are generally more effective than sanctions in promoting compliance and successful outcomes in community supervision. Incentives encourage compliant and positive behavior. The EPICS model suggests four different types of positive reinforcement that community corrections use:

- Tangible - food, clothing, bus passes, gift cards
- Token – awards and certificates
- Activities – watching tv, listening to music, hiking
- Social praise – specific direct and indirect praise to promote pro-social thoughts and behaviors.

Resources

We partner with several community organizations—such as Chemeketa Community College, Marion County Health and Human Services, and local courts—to support initiatives like Drug Court, Mental Health Court, Veterans Court, and services for drug-endangered children. Our goal is to expand these partnerships to support client rehabilitation and community safety.

Bridgeway Community Health - Treatment and Mentor Services

The Community Corrections Division currently offers evidence-based substance use treatment and mentoring services for clients. The current provider, Bridgeway Community Health, delivers alcohol and drug programming tailored to address criminogenic needs and responsivity factors across all phases of treatment. The program is firmly grounded in Evidence-Based Practices (EBP). Bridgeway Community Health provides services to all supervised clients at their off-site facility. Additionally, they offer specialized group programming for SB416 caseloads, including on-site mentoring groups.

High and Medium Risk Sex Offender Treatment

The Community Corrections Division contracts with Effective Foundations, an evidence-based treatment provider, to deliver a range of services including sex offender treatment, case planning, and cognitive interventions for indigent clients assessed as medium or high risk to sexually reoffend. Based on proven treatment models, Effective Foundations offers both individual and group therapy with the primary goal of reducing criminal behavior and enhancing community safety. These goals are pursued by motivating clients to adopt pro-social lifestyles and equipping them with skills to recognize and replace maladaptive thoughts and behaviors. Clients are taught essential tools such as problem-solving, impulse control, and behavioral management. In collaboration with Marion County Community Corrections, Effective Foundations will provide a minimum of 250–300 hours of cognitive-based services for the target population, which includes relapse prevention and aftercare. All services are designed to enhance client motivation, address criminogenic risk factors, and support the development of pro-social behavior.

Polygraphs

The Community Corrections Division contracts with a licensed polygraph examiner to provide regular, subsidized polygraph services for indigent clients who are required to complete polygraph examinations as a condition of their supervision. The examiner is authorized to administer full-disclosure, maintenance, and specific-issue polygraphs as part of the division's supervision and surveillance strategies.

Polygraph examinations are a critical tool in the evidence-based supervision of certain client populations. They help determine compliance with supervision conditions, identify potential violations, and gather accurate offending or criminal history to inform treatment planning.

The Pathfinder Network (TPN)

TPN Peer Mentors support individuals 18 and older who are currently involved in the criminal justice system in Marion County. Peer Support Specialists, with lived experience, engage participants in a goal-oriented collaborative relationship and provide personalized support through holistic and responsive individual and group support services. They work together to reinforce successes and build self-efficacy, hope, and resilience. TPN offers employment assistance, mentoring, and cognitive classes on the Community Corrections, Aumsville Hwy campus. Community members seeking reentry services can get help with resumes, job searches, and other support needs, such as:

- Wrap-around peer support service navigation
- Drop-in support
- Transition and reentry support
- Peer support classes, groups, activities, and events
- Resilience and recovery action planning

Subsidized Transitional Housing

All clients being released to Marion County, without an identified residence, are identified prior to their release. Each case is evaluated to assess whether the individual poses a significant risk to public safety. Additionally, a review is conducted to determine if subsidizing their housing would improve the likelihood of compliance with supervision requirements and reduce the risk of reoffending.

For other non-transitional clients with substantial housing needs, those who have shown motivation and compliance may also be eligible for housing subsidies. This approach aims to maximize the effectiveness of resource allocation, increasing the chances of a positive outcome.

Batterer Intervention Providers (BIPs)

The primary goals of Batterer Intervention Programs (BIPs) are to stop the use of violence and prevent its recurrence, while consistently prioritizing the safety and well-being of victims. These programs work to identify and confront patterns of abusive behavior, hold individuals accountable for their actions, and provide education on healthy, non-violent alternatives to abuse. Through these efforts, BIPs aim to promote lasting behavioral change and reduce the risk of future harm.

The Marion County Sheriff's Office Community Corrections Division provides supervision, sanctions, and services that promote accountability while supporting individuals in making lasting change. Our work is not done alone—we rely on strong partnerships with local agencies, service providers, and community members to help people access treatment, housing, education, and employment opportunities that reduce the risk of reoffending. By combining accountability with meaningful support, we strive to strengthen families, restore hope, and create safer neighborhoods. Together with our community, we are building a safer, healthier Marion County for everyone.

Marion County 2025-2027 Community Corrections Biennial Plan

Department of Corrections 3723 Fairview Industrial Drive SE Salem, Oregon 97310	<i>For Office Use Only</i> Date Received:
Address: Marion County Sheriff's Office 100 High Street NE Salem, OR 97309 Phone: (503) 588-5094 Fax: (503) 588-7931

Program Name:	Administration
Program Description:	<p>Administration</p> <p>The Administration provides oversight and coordination across the supervision and program areas of the Community Corrections Division. A Commander leads the division and is responsible for strategic direction, inter-agency coordination, and overall performance. Two Lieutenants report to the Commander and supervise four Sergeants. One Lieutenant oversees training, hiring, and policy development; the other oversees mental health services, and treatment-related programs. A Senior Office Manager supervises the support services units, including records, reception, and the fee unit.</p> <p>The division has transitioned from a directive-based model to one that uses evidence-based practices in supervision and program delivery. Administration staff work with system partners to develop public safety policy, coordinate funding efforts, and meet contractual requirements with the Oregon Department of Corrections, including outcome reporting and compliance monitoring.</p> <p>Support Services</p> <p>Support Services assist in the daily functions of Community Corrections. Reception staff are the initial point of contact for clients, visitors, and community members. They process reports, route information, and ensure that adjudicating authorities receive sanctions and warrants in a timely manner. Records staff open and close case files, update abscond status, and track client activity in the operational time system. The Fee Unit processes client payments and sends restitution billing, supporting accountability and the financial obligations imposed by the court or supervision agreements.</p> <p>Operations Division</p> <p>The Operations Division of the Sheriff's Office provides administrative support to the Enforcement, Institutions, and Community Corrections divisions. It carries out several mandated functions of the Sheriff's Office, including civil process, judicial security, alarm permits, and concealed handgun licensing. The division also supplies necessary administrative staff for continuous, around-the-clock public safety operations.</p> <p>Community Corrections is supported through the Operations Division by the following positions, which are partially or fully funded by the Community Corrections budget:</p> <ul style="list-style-type: none"> • Contract Specialist (1 FTE): Manages contracts with housing providers, substance use treatment services, sex offender treatment and polygraphs, electronic monitoring, and other related services. • Property Specialist (0.25 FTE): Purchases uniforms, safety equipment, and other supplies for both deputies and non-sworn staff supporting Community Corrections. • Administrative Assistants (0.74 FTE): Assist with hiring, payroll, timesheet management, and personnel records. These positions help maintain communication with applicants and facilitate the hiring process to meet staffing needs. • Accounting Specialist (1 FTE): Processes invoices, pays bills, and manages financial transactions related to contracts and services used by Community Corrections. • Sheriff (0.24 FTE): Provides leadership, direction, and oversight to the division, helping align Community Corrections with broader agency goals. • Management Analyst (1 FTE): Oversees grant reporting and ensures compliance with requirements. This position maintains grant documentation, tracks performance, and supports data-driven decision-making through dashboards and reporting tools. • Budget Analyst (0.24 FTE): Prepares budgets, forecasts personnel costs, analyzes historical spending, and provides guidance on funding sources. This information supports informed decision-making related to spending, staffing, and resource allocation. • Senior Office Manager (0.44 FTE): Supervises administrative staff, including administrative assistants, management analysts, property specialists, and accounting specialists. This position oversees hiring processes and budget-related tasks within the administrative unit.

	<ul style="list-style-type: none"> Undersheriff (0.44 FTE): Oversees daily operations, personnel, budgets, and policy implementation for the Sheriff's Office. The Undersheriff supports Community Corrections by ensuring consistent operations, inter-division coordination, strategic planning, and compliance with regulations. Executive Administrative Assistant (0.18 FTE): Supports the Sheriff and Undersheriff by managing communications, assisting with policy development, coordinating Continuity of Operations Planning (COOP), and participating in IT and planning committees. This support enables executive staff to focus on agency operations and decision-making. Deputy Sheriff (0.33 FTE): Conducts background investigations on prospective employees. This position gathers and verifies applicant information to support hiring decisions across Community Corrections and other divisions. <p>Enforcement Division</p> <ul style="list-style-type: none"> Evidence Technician (0.25 FTE): Processes and manages evidence and property submitted by Community Corrections Deputies, including contraband, items related to violations or new crimes, and personal property placed in safekeeping. The position ensures proper handling and documentation of all items in accordance with policy and legal standards.
Program Category:	Administration
Program Objectives:	<p>To provide leadership, program development, policy development and financial oversight for the division. To ensure staff are trained, equipped and are compliant with departmental policies, procedures, Oregon Administrative Rule, Oregon Revised Statutes, and Intergovernmental Agreements with DOC.</p> <p>The Operations and Enforcement Division provide support in hiring, administrative functions and evidence storage.</p>
Method(s) of Evaluation:	Grant reporting, dashboards, internal business reports, and annual reports.

Additional Comments:

Program Name:	Bridgeway Community Health - Treatment and Mentor Services
Program Description:	The Community Corrections Division currently offers evidence-based substance abuse treatment and mentoring services for adult clients. The current provider, Bridgeway Community Health, delivers alcohol and drug programming tailored to address criminogenic needs and responsivity factors across all phases of treatment. The program is firmly grounded in Evidence-Based Practices (EBP). Bridgeway Community Health provides services to all supervised clients at their off-site facility. Additionally, they offer specialized group programming for Senate Bill 416 caseloads, including on-site mentoring groups. Bridgeway is also expanding its services to include on-site group classes and assessments for the incarcerated population at the Marion County Transition Center.
Program Category:	Behavioral Health Tx Services - Substance Abuse
Program Objectives:	<ul style="list-style-type: none"> • Enhance community safety. • Reduce criminal activity. • Assist clients with substance abuse related problems, to enter a viable program and maintain a substance free life style.

Additional Comments:

Program Name:	Community-Based Custodial Alternatives
Program Description:	<p>Several intermediate sanction options are available for clients on probation and post-prison supervision. One such option is the Electronic Monitoring Program, which is managed by a case aide. This program serves as a jail alternative, allowing community corrections deputies to increase surveillance for higher-risk clients. It is also used by local courts for defendants awaiting trial and for sentenced individuals. Additionally, the Electronic Monitoring Program may be used for certain high-risk adults in custody at the Transition Center, allowing them to maintain outside employment while completing their term of incarceration.</p> <p>Another intermediate sanction option is Day Reporting. This program enhances client accountability and provides access to referrals and resources, including substance use treatment and resource centers.</p> <p>Both custodial alternatives are used on occasion for individuals who are released from custody, but are still being supervised on their Local Control sentence.</p>
Program Category:	Community-Based Custodial Alternatives
Program Objectives:	<ul style="list-style-type: none"> • Independent verification of compliance. • Intensive surveillance clients. • Cost-effective and risk-appropriate alternatives to incarceration.

Additional Comments:

Program Name:	Mental Health Services
Program Description:	<p>Mental health services are provided by a Mental Health and Evaluation Specialist who holds a Master of Social Work and is certified as a Qualified Mental Health Professional. These services support clients transitioning from incarceration to the community, as well as those currently on probation, parole, or post-prison supervision. The specialist delivers case management, supervision strategy consultations, psychiatric evaluations, assessments, diagnoses, treatment referrals, transition planning, service coordination, and medication support.</p> <p>In addition to providing direct services, the specialist serves as a consultant, trainer, and liaison between the division and community partners, including Marion County Adult Behavioral Health, the Department of Corrections (DOC), Marion County Jail, the Psychiatric Crisis Center, and local treatment providers.</p>
Program Category:	Other Programs and Services
Program Objectives:	Assess and support adult clients through comprehensive evaluations—including risk and mental health assessments—to determine treatment needs, facilitate access to services, and provide case management strategies that promote client stability, reduce recidivism, and support probation/parole supervision goals.
Method(s) of Evaluation:	Referral tracking, evaluation results and medication support tracking.

Program Name:	Custodial/Sanction Beds
Program Description:	Marion County Community Correctins utilizes the Marion County Jail to house clients serving custodial sentences of one year or less, including those serving sanctions related to probation or post-prison supervision, as well as individuals whose supervision has been revoked. The jail is a maximum-security, direct supervision facility that operates in alignment with the vision and operational principles of the Marion County Sheriff's Office, as outlined in ORS 169.076 and the Oregon Jail Standards. With a budgeted capacity of 470 Adults in Custody (AICs), the jail is designed to ensure public safety, hold individuals accountable, and support successful community reintegration through reentry programming and work crew opportunities when appropriate.
Program Category:	Custodial/Sanction Beds
Program Objectives:	To maintain accountability and reduce criminal behavior.

Additional Comments:

Program Name:	High and Medium Risk Sex Offender Treatment
Program Description:	<p>The Community Corrections Division contracts with Effective Foundations, an evidence-based treatment provider, to deliver a range of services including sex offender treatment, case planning, and cognitive interventions for indigent clients assessed as medium or high risk to sexually reoffend. Based on proven treatment models, Effective Foundations offers both individual and group therapy with the primary goal of reducing criminal behavior and enhancing community safety.</p> <p>These goals are pursued by motivating clients to adopt pro-social lifestyles and equipping them with skills to recognize and replace maladaptive thoughts and behaviors. Clients are taught essential tools such as problem-solving, impulse control, and behavioral management.</p> <p>In collaboration with Marion County Community Corrections, Effective Foundations will provide a minimum of 250–300 hours of cognitive-based services for the target population, which includes relapse prevention and aftercare. All services are designed to enhance client motivation, address criminogenic risk factors, and support the development of pro-social behavior.</p>
Program Category:	Behavioral Health Tx Services - Sex Offender Tx
Program Objectives:	<ul style="list-style-type: none"> • Multi-disciplinary team collaboration for community supervision of clients. • Encourage the development of pro-social support networks and community accountability partners. • Utilize cognitive behavioral interventions to address client risk factors, self-management, relapse prevention strategies and impulse control. • Promote victim and community safety. • Diminish clients' anti-social attitudes and beliefs.

Additional Comments:

Program Name:	Supervision
Program Description:	<p>The Community Corrections Division supervises clients in Marion County to improve public safety, enforce court orders, and promote accountability. We collaborate with criminal justice partners, focus on high-risk clients, and use evidence-based practices (EBP) to guide supervision and case management.</p> <p>We apply EBP tools such as risk assessments, case planning, motivational techniques, and targeted sanctions and services to reduce reoffending. All staff are trained in the EPICS model (Effective Practices in Community Supervision) from the University of Cincinnati, enabling officers to address key criminogenic risk factors. Four staff members are certified EPICS instructors to ensure consistent quality and adherence.</p> <p>We partner with community organizations—such as Chemeketa Community College, Marion County Health and Human Services, and local courts—to support initiatives like Drug Court, Mental Health Court, Veterans Court, and support for drug-endangered children. These partnerships are central to our goal of enhancing client rehabilitation and community safety. We also provide contracted polygraph examinations and program coordination—polygraph oversight plays a role in structured surveillance and treatment compliance monitoring.</p> <p>Caseloads are organized by risk level, crime type, and geographic region to foster community connection. Parole and probation deputies offer intensive supervision—incorporating risk-based interventions for individuals leaving jail, sex-offender notifications, transitional pre-release planning, pre-sentence investigations, and formal hearings for probation or parole violations—in alignment with statutory, policy, and contractual requirements.</p> <p>Intake Services include client orientation, use of motivational (URICA-based) and cognitive restructuring group referrals, screening for proper supervision placement, and issuance of warrants for non-reporting individuals.</p> <p>Our sanctions and hearing framework involves a spectrum of intermediate consequences—such as electronic monitoring, curfews, day reporting programs, house arrest, and brief jail stays—managed through structured due-process hearings.</p> <p>Field Training & Evaluation provides a 40-week onboarding and evaluation program where new deputies are mentored by DPSST-certified Field Training Officers, ensuring operational readiness and consistency.</p> <p>We manage Interstate Compact supervision, with designated staff responsible for timely investigation, approval, and case management when clients transfer across state lines.</p> <p>Contracted polygraph services include full-disclosure, maintenance, and issue-specific examinations as part of our supervision strategy.</p> <p>The Division also relies on Transitional Pre-release Planning, conducting comprehensive assessments to prepare clients for successful community reintegration.</p> <p>Specialized caseloads include units for General Supervision, Domestic Violence, Sex Offenders, Special Services, Limited Supervision, Gender Responsive, Pre-sentence Investigation, FSAP, 1145 (Local Control), SB416 Pilot, Downward Departure, Transitional Services, and client participation in Drug Court, Mental Health Court, and Veterans Treatment Court.</p> <p>This integrated approach weaves intake, training, sanctions, hearings, interstate oversight, polygraph monitoring, pre-release planning, and community partnerships into our broader EBP framework—supporting stronger supervision, accountability, and pathways to change.</p>
Program Category:	Supervision
Program Objectives:	To protect the public and reduce recidivism by providing the highest level of supervision to clients who present the greatest risk.
Method(s) of Evaluation:	<ul style="list-style-type: none"> • Statewide Outcome Measures. • In-house caseload audits and individual performance evaluations.

Additional Comments:

Program Name:	Transitional Services
Program Description:	<p>Marion County Community Corrections has multiple resources available for clients releasing from prison by providing services that begin before release and continue into the community. These services are designed to help people reintegrate into the community and meet supervision requirements.</p> <p>Reach-ins</p> <p>Agency staff or partner organizations meet with Adults in Custody (AICs) prior to their release. These meetings are used to share information, assess needs, and begin planning for release. The goal is to connect AICs with support before they leave prison.</p> <p>Short Term Transitional Leave (STTL)/Alternative to Incarceration Program (AIP) Supervision</p> <p>Clients who complete the Oregon Department of Corrections' Alternative to Incarceration Program (AIP) or meet the criteria for Short Term Transitional Leave (STTL) are released to transitional leave and receive a telephonic reach-in from a Transitional Services parole/probation deputy to begin the transition process. After release, they are supervised in the appropriate unit, assessed using the LS/CMI tool, and connected to services based on an individualized case plan.</p> <p>Subsidized Transitional Housing</p> <p>All clients being released to Marion County, without an identified residence, are identified prior to their release. Each case is evaluated to assess whether the individual poses a significant risk to public safety. Additionally, a review is conducted to determine if subsidizing their housing would improve the likelihood of compliance with supervision requirements and reduce the risk of reoffending.</p> <p>For other non-transitional clients with substantial housing needs, those who have shown motivation and compliance may also be eligible for housing subsidies. This approach aims to maximize the effectiveness of resource allocation, increasing the chances of a positive outcome.</p> <p>The Pathfinder Network</p> <p>The Pathfinder Network is a partner organization that provides services before and after release:</p> <ul style="list-style-type: none"> • Transition from Jail to Community (TJC): Offers cognitive programming to people while they are still in custody to help them change thinking patterns and prepare for release. • Resilience and Recovery Project: Connects people on post prison supervision or probation with mentors who case plan with clients, connect them to resources, offer support and guidance while on supervision. • Resource Center at the Transition Center: Offers employment assistance, mentoring, and cognitive classes. People can get help with resumes, job searches, and other support needs.
Program Category:	Transition Services
Program Objectives:	<ul style="list-style-type: none"> • To educate releasing clients and their families on community supervision and the resources available to them. • To provide clients being released into our community a positive reintegration through targeting meaningful interventions. • Use mentor services to connect clients with resources to be successful in the community. • Reduce recidivism rates by providing services proven by research to assist in mitigating a releasing clients' criminogenic needs. • Ensure clients have appropriate housing to reduce barriers, leading to
Method(s) of Evaluation:	<ul style="list-style-type: none"> • Statewide Outcome Measures.

• Reporting rates of releasing clients for their initial appointment with our office.
