

MARION COUNTY FY2009-10 BUDGET
APPENDIX A
TRANSITION TO NEW BUDGET FORMAT BRIEFING POINTS

**Marion County
Budget Orientation
FY 2009-10**

Each year, the budget team at Marion County looks for opportunities to improve both the budget process and the budget document. In order to facilitate the Budget Committee's use of the Marion County FY 2009-2010 Proposed Budget information, the following items should be noted:

Highlights – generally consistent with last year:

- The FY 2008-09 Budget information has been updated through the second supplemental budget as adopted in March 2009.
- Departments that are 100% General Fund supported will generally have matching total resources and total requirements in the actual columns. At the end of the fiscal year, the final general fund transfer is adjusted to equal the total final requirements amount. Non-General Fund departments will generally show greater resources than expenditures and are not “balanced” at the end of each year. This is generally due to budgeted contingency and ending fund balance that do not have “actual” expenditures. Example: Legal Department – page 167.
- Personal Services wages are budgeted as one all-inclusive line item. During the year, the actual expenditure of wages is accounted for by specific category such as vacation pay, holiday pay, sick pay, etc. Therefore, actual columns reflect expenditures in these categories while budget columns do not.
- As discussed earlier, Marion County adopts the annual budget by Fund. The Funds section of the binder provides a summary of all county Fund budgets (by total only) on two different schedules – one by all departmental funds and the other by all non-departmental funds. The fund detail statements for the departmental funds have been included at the end of each department section of the budget book. Example: Sheriff's Office – page 310. The fund detail statements for the non-departmental funds are found following the summary schedules – see page 567.
- Exhibit B-1 details the changes in FTE by department. This schedule uses FTE counts from the adopted budget for each year. In the departmental budgets, the FY 2009-2009 budget has been updated through the second supplemental as of March 2009, including changes in FTE. This will result in differences between the department budget total FTE and the Exhibit B-1 total FTE. Example: Assessor's Office – page 39 & B-1.

This will result in differences between the department budget total FTE and the Exhibit B-1 total FTE. Example: Assessor's Office – page 39 & B-1.

MARION COUNTY FY2009-10 BUDGET
APPENDIX A
TRANSITION TO NEW BUDGET FORMAT BRIEFING POINTS

- Hwith all salary related fringe benefits such as FICA) and fringe benefits budget is understated for PERS but overstated for Medical and Dental Premiums, which creates artificial comparison information with the FY 2009-2010 proposed budget. Finally, staffing reductions and the effect on wages and benefits impact the overall comparability between years. The variance in the total Personal Services budget more accurately reflects the actual changes, net of the effect of any budgeted vacancy savings. Example: Assessor's Office – pages 39, 43 & 52.
- The rate used to calculate PERS budget amounts in the Fringe Benefit category has been reduced by 2.5% compared to FY 2008-2009. Marion County's actual rate from Oregon PERS will be reduced by 2.5% beginning July 1, 2009 through June 30, 2011. The rate reduction is reflective of "better than anticipated" investment returns for Oregon PERS.
- There is a new Administrative Charge for all departments – MCBEE. In the FY 2008-2009 budget, the personnel related budgets were included in Finance and IT, and the materials and services budget was included in non-departmental. For FY 2009-2010, all MCBEE related budget items were accumulated in one program. The personnel portion of the budget is allocated through administrative charges, just as it was in FY 2008-2009 within the Finance and IT allocations. The materials and services portion of the MCBEE budget will continue to be funded through a transfer from the general fund, as it was in FY 2008-2009. See page 536.
- The Non-Departmental section of the binder includes budgets for county Debt Service, Reserve Funds, and the Self Insurance Fund. In addition, all remaining budgets that are not associated with a department are included in this section, such as the Lottery Distribution Fund, the County Schools Fund, and the Marion County Business Enterprise Enhancement (MCBEE) program.

Finally, please note that this year is considered a transition year – both in the upgrades to BUD and the implementation of a new COA. We are aware of several minor technical improvements that have been identified (e.g. missing page breaks on fund statements, blank pages, alphabetical ordering, certain naming conventions, etc.) and will be implemented in future versions of BUD.

- Hwith all salary related fringe benefits such as FICA) and fringe benefits budget is understated for PERS but overstated for Medical and Dental Premiums, which creates artificial comparison information with the FY 2009-2010 proposed budget. Finally, staffing reductions and the effect on wages and benefits impact the overall comparability between years. The variance in the total Personal Services budget more accurately reflects the actual changes, net of the effect of any budgeted vacancy savings. Example: Assessor's Office – pages 39, 43 & 52.
- The rate used to calculate PERS budget amounts in the Fringe Benefit category has been reduced by 2.5% compared to FY 2008-2009. Marion County's actual rate from Oregon PERS will be reduced by 2.5% beginning July 1, 2009 through June 30, 2011. The rate reduction is reflective of "better than anticipated" investment returns for Oregon PERS.
- There is a new Administrative Charge for all departments – MCBEE. In the FY 2008-2009 budget, the personnel related budgets were included in Finance and IT, and the materials and services budget was included in non-departmental. For FY 2009-2010, all MCBEE related budget items were accumulated in one program. The personnel portion of the budget is allocated through administrative charges, just as it was in FY 2008-2009 within the Finance and IT allocations. The materials and services portion of the MCBEE budget will continue to be funded through a transfer from the general fund, as it was in FY 2008-2009. See page 536.
- The Non-Departmental section of the binder includes budgets for county Debt Service, Reserve Funds, and the Self Insurance Fund. In addition, all remaining budgets that are not associated with a department are included in this section, such as the Lottery Distribution Fund, the County Schools Fund, and the Marion County Business Enterprise Enhancement (MCBEE) program.

Finally, please note that this year is considered a transition year – both in the upgrades to BUD and the implementation of a new COA. We are aware of several minor technical improvements that have been identified (e.g. missing page breaks on fund statements, blank pages, alphabetical ordering, certain naming conventions, etc.) and will be implemented in future versions of BUD.

MARION COUNTY FY2009-10 BUDGET
APPENDIX A
TRANSITION TO NEW BUDGET FORMAT BRIEFING POINTS
